

## **8 Week Planning**

Period: 01.06.24 (Saturday) to 31.07.24(Wednesday)

Week 1 - 01.06.24 (Saturday) to 07.06.24(Friday)

Creation of project execution plan. Introduction to online information extraction techniques and setting up of the environment in the system.

Week 2 - 10.06.24 (Monday) to 14.06.24(Friday)

Introduction to the docquery library and setting up all the necessary requirements. Collecting data (pdf, docs) from online sources. The data collected is majorly health insurance samples from various insurers. Initial extraction is primarily from a single data (pdf/doc) and conversion to csv file will take place.

Week 3 - 17.06.24 (Monday) to 21.06.24(Friday)

More extraction will take place so that there lies variability in the data and the model works properly. And in later stages extractions from multiple data will take place in one go (on files that lie on the same path). Again extracted data is converted to csv file.

Week 4 - 24.06.24 (Monday) to 28.06.24(Friday)

After Model creation, frontend will be built to provide a UI for the same.

Week 5 - 01.07.24 (Monday) to 05.07.24(Friday)

Frontend works continue.

Week 6 - 08.07.24 (Monday) to 12.07.24(Friday)

API Development

Week 7 - 15.07.24 (Monday) to 19.07.24(Friday)

API Development(contd)

Week 8 - 22.07.24 ((Monday) to 26.07.24(Friday), contd till 31.07.24(Wednesday))

Finalization of the project and fixing of issues/bugs. Demonstration and presentation of the project to supervisors and seniors will be conducted.
