Work done during Week (in detail) : In this week, after resolving all errors with the help of guidance, I tested the environment with various documents to ensure it returned the correct information. I completed information extraction from single files using the setup environment established the previous week. I also explored and understood the functionality of Hugging Face's online software for data extraction. Additionally, I studied methodologies for multiple file extraction and collected sample health insurance policies available online. From these samples, I will extract necessary query details, such as policy holder's name, insured member's details, period of insurance, sum insured etc.
